PROJECTS

Fake News Detection System Using Machine Learning

Jan 2024 - Apr 2024

Role : Developer

Description : Developed a machine learning model to detect fake news by comparing the accuracy of multiple classifiers, including Convolutional Neural Networks (CNN) and Decision Trees. Analyzed and visualized classifier performance using confusion matrices and accuracy graphs to identify the most reliable classifier. Sourced and preprocessed datasets from open-source repositories, enabling the model to manually test and verify article authenticity effectively.

Pharmacy Management

Sep 2024 - Ongoing

Role : Developer

Description : Developed a Pharmacy Management System with a structured interface including a Home Page for dashboard insights, a Medicines Page for inventory display, an Add Medicine Page for seamless stock updates, and a Wanted Stock Page to track low-inventory alerts. Implemented efficient data handling and user-friendly navigation to streamline pharmacy operations. Enhanced system functionality with a focus on intuitive design and real-time stock monitoring.

Movie Database
